Billing

*Therap's **Billing Support** offers a collection of tools, designed to help with service authorization management, service tracking, electronic claim creation and related functions.*

Service Authorizations

Flexible options are provided for tracking service authorizations, remaining balance and expiration dates.

Service Records

Billing amounts are calculated directly from service and attendance logs. The system matches billing records against valid service authorizations.

Claim Submission & Tracking

Professional and Institutional Claims can be submitted electronically to Medicaid. The system can also track the status of these claims.

Medicaid Audits/QA

The system provides efficient ways of tracking service authorizations. Service records can be traced back to individuals' ISPs. In addition, Therap's Utilization Reports can be generated to track average usage and remaining balance.

HIPAA 5010 Compliant

Therap's Electronic Billing complies with the federal mandated ASC X12 v5010 requirements.

Staff Scheduling

Create weekly schedules for residential & community based services

Build and use Master Schedule templates

Track staff hours and overtime

View personal & coworkers' schedules on Therap Calendar

Share schedules across programs

Training Management

Set-up training program curriculum, courses & classes

Track due/overdue classes, assignments and certifications

Manage enrollment and sign ups

Manage instructors

View training history

Electronic Health Records

Health Tracking

The Health Tracking module allows users to efficiently track different categories of health data.

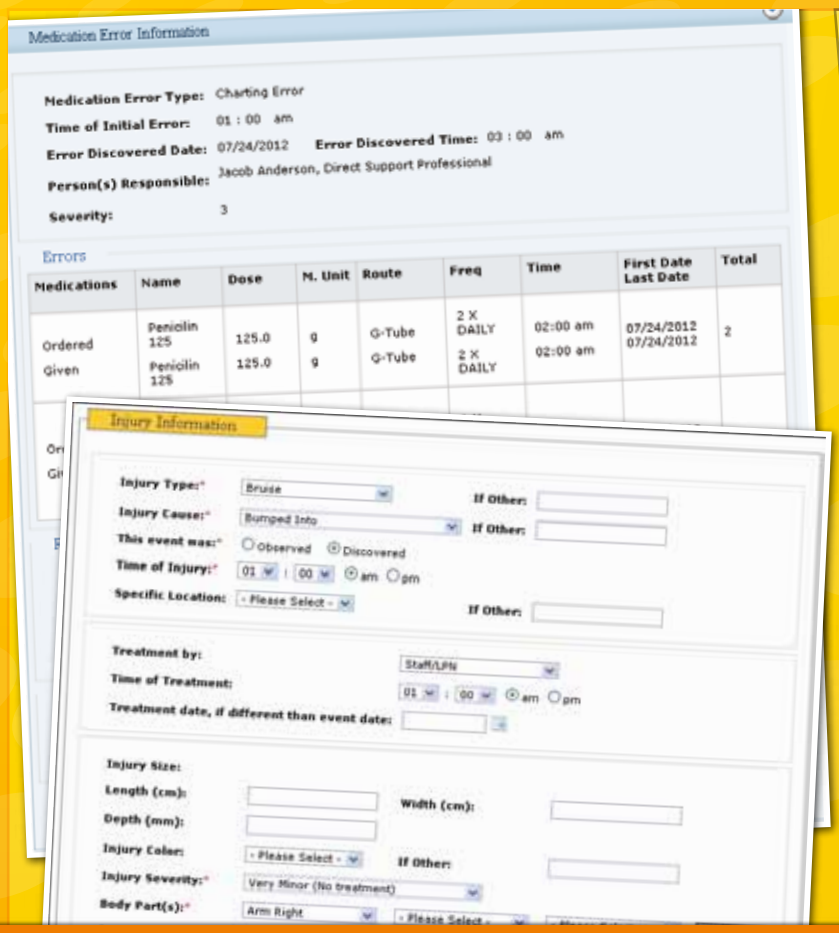
- Document and track a broad range of medical issues including vital signs, seizures, blood glucose, lab tests and appointments
- Track individuals' medication histories and allergy profiles
- View monthly and detailed reports

Medication Administration Records

- Quick and Detail Modes of data entry
- Medication History
- Monthly MAR reports
- First Databank integration

Other Forms

- Comprehensive Health Assessment
- Emergency Psychotropic Medication Initiation
- Monitoring of Side-Effects Scale (MOSES)
- Minimal Effective Dose (M.E.D) Workplan
- Psychotropic Medication Use Checklist (PMUC)



Incident Reports

General Event Reports

The Therap General Event Reports (GER) module has been designed to track, store, and maintain multiple related incidents for an individual and investigate the results. This module can be used to document, with specific details, a wide variety of incidents including injuries, behavioral concerns, medication errors, and death, among others. With this, users are able to record observed or discovered incidents specifying three levels of notifications low, medium and high.

- Instant event reporting and sharing
- Electronic sticky notes
- Restricted access to abuse/neglect incidents
- Flexible notifications
- Body diagrams to locate injuries
- Trend reporting
- Export reports to PDF

Individual Support Plans & Service Logs

Implementation/Support Planning

- Create methodical and concise implementation/support plans for individuals
- Define goals and objectives with customized scoring methods
- Effectively document and meet Medicaid & state's survey requirements
- Manage HCBS, SILS, Habilitation, ICF/DD and other services

Service Logs & Progress Tracking

- Track service logs against support plans and service authorizations
- Generate billing information directly from service logs or attendance logs
- Track service utilization
- Generate Progress Reports, Graphs and Time Logs for any period of time

Includes

- ISP Template Library
- ISP Programs
- ISP Reports

Management & Trend Reporting

With appropriate access privileges, Therap users are able to generate a variety of reports from the information stored in the system. These include:

Management Summaries

- Incidents & Behavioral Event Summaries
- Demographic Report
- Staff Reports based on User Profiles
- Account Activity Tracking Reports

ISP Reports

- Programmatic Reports
- Clinician Reports

Health Reports

- Monthly/Quarterly Health Reports
- Medication History & Administration Reports

Training Management Reports

Billing Reports

- Built on a current, object-oriented technology platform
- Hosted in multiple live sites mirrored across non-contiguous states
- Agile development to implement state and federal requirements
- Data Integrity through audit trails, electronic signatures and comprehensive back-up
- HIPAA, HITECH, ARRA compliant
- Exceptional Support via: Live Help, Phone and On-Line Resources
