

The CSDDS Emergency Individual Data Factsheet automatically extracts and places data from an approved IDF for an individual.

CTEDF Field	Corresponding Therap IDF Field										
Completion/Update Date	Approved By										
Photo Date	Photo Date										
Individual	Individual Name										
DDS Number	ID Number										
DOB	Date of Birth										
Residential Address	Residence Address										
Provider	Extracted from Provider Information										
Program & Address and Phone number	Program & Address and Program Phone Note - If there is no information in these two fields then it will be taken from the 'Program & Site' section. Programs are of three types – Day Program, Residential Program and Others. If an individual is enrolled in multiple programs, information from the Day Program in the list will be extracted to the EDF. If there are no Day Programs in the list then info from the first Residential Program in the list will be extracted to the EDF. If an individual is not enrolled in any Day or Residential Program, no information will be extracted to the EDF.										
Physician	Shared Contacts Note - Information is extracted from the 'Shared Contacts' section in the IDF. If multiple physicians are listed in this section then the first physician contact information will be extracted to the EDF.										
Pharmacy	Shared Contacts Note - Information is extracted from the 'Shared Contacts' section in the IDF. If multiple pharmacies are listed in this section then the first physician contact information will be extracted to the EDF.										
Medicaid Number	Medicaid Number										
Family Contact	Contacts Note - Shared Contacts Information is extracted from the 'Contacts' section in the IDF. Only information of those contacts who are related to the individual in these four categories – Parent, Spouse, Relative and Guardian will be extracted to the EDF. If multiple such contacts are in the list then the information of the first contact in the list will be extracted. <div style="float: right; margin-top: 10px;"> <table border="0"> <tr> <td>* Relationship To Individual</td> <td><input type="text" value="Relative"/></td> </tr> <tr> <td>Guardian Type</td> <td><input type="text" value="- Please Select -"/></td> </tr> <tr> <td>Medical Guardian</td> <td><input type="text" value="Parent"/></td> </tr> <tr> <td></td> <td><input type="text" value="Spouse"/></td> </tr> <tr> <td></td> <td><input type="text" value="Relative"/></td> </tr> </table> </div>	* Relationship To Individual	<input type="text" value="Relative"/>	Guardian Type	<input type="text" value="- Please Select -"/>	Medical Guardian	<input type="text" value="Parent"/>		<input type="text" value="Spouse"/>		<input type="text" value="Relative"/>
* Relationship To Individual	<input type="text" value="Relative"/>										
Guardian Type	<input type="text" value="- Please Select -"/>										
Medical Guardian	<input type="text" value="Parent"/>										
	<input type="text" value="Spouse"/>										
	<input type="text" value="Relative"/>										

	<p>Other form of relationships such as Advocate, Case Worker will only be extracted if the Medical Guardian field has been selected as 'Yes' in IDF and will show as a Medical Guardian field in EDF.</p> <p>* Relationship To Individual <input type="text" value="- Please Select -"/> Guardian Type <input type="text" value="- Please Select -"/> Medical Guardian <input checked="" type="radio"/> Yes <input type="radio"/> No</p>
