

Incident Reporting (General Event Reports)

Incident Reporting in Therap is done through our General Event Reports Module. This allows agencies to document internal, reportable, and serious reportable incidents in the same place. Therefore, quality assurance staff will be able to run reports based on all incidents that have occurred across the whole agency or any given section of it. Incidents entered into Therap are immediately available for statistical reporting and trending. The Therap General Event Reports (GER) module has been designed to track, store, and maintain multiple related incidents for an individual and investigate the results. New York users can use this module to document, with specific details, a wide variety of incidents including injuries, behavioral concerns, medication errors, and deaths among others. Users in New York can record the

observed or discovered incidents specifying three levels of notifications: Low, Medium and High. Agencies have the flexibility to use notification levels, according to their preference, to reflect Low-Level or Critical Incidents. Detailed event information, including event date, location, and description, can be added in the GER for specific events like Injury, Medication Error, Restraint Related to Behavior, Restraint Other, and Death among many more.

General Event Reports (GER)

Incident Reporting

► **(OPWDD 147/148)** : Therap's General Event Reports (GER) (also known as Incident Reports) can be used by New York users to submit reportable and serious reportable incident reports to New York State. The GER application

currently supports the OPWDD 147 and OPWDD 148 state specific forms.

The OPWDD 147 and OPWDD 148 forms in Therap meet the requirements of the existing forms of NY OPWDD, and have

the same look and feel of the forms currently being used by NY State. These reports can be directly exported to PDF format and can later be printed and submitted to state.

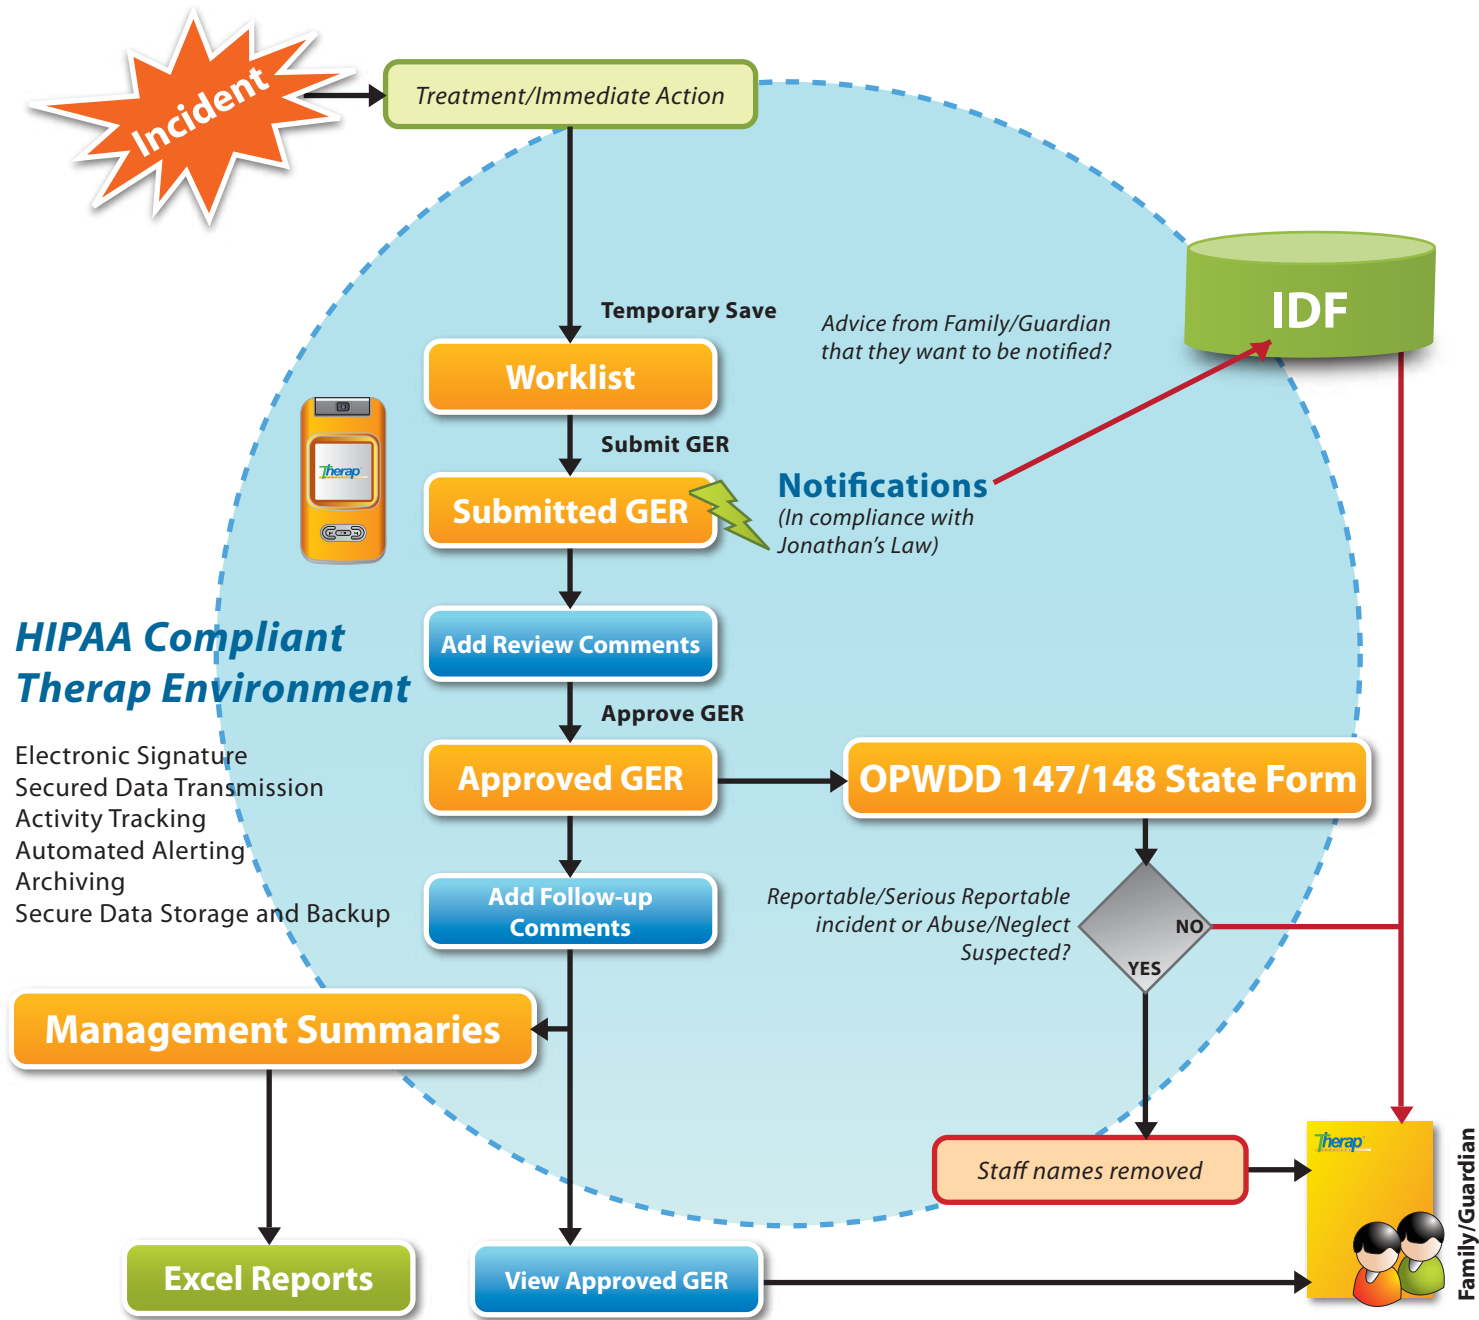

Figure: Therap's General Event Reporting (Incident Reporting) mechanism

Incident Reporting

► **Jonathan's Law** : Therap will also help you meet your obligations under Jonathan's Law. Notification to guardians and other necessary personnel as required by Jonathan's Law can be documented within the GER module. Therap can send automatic alerts and real-time notifications using the following media: Email, Text Message, Pager, and Therap's HIPAA Compliant Secure Communications (SComm) module.

When an incident takes place, staff members can provide the treatment/immediate action and then

start working on Therap's GER forms. Incomplete GERs can be saved and finished later by staff members. When a GER is completed, it can be submitted for further review. Once ready, the forms can then be approved, and follow-up comments can be added. When an incident report is submitted, the system

checks if notifications were made as requested by the family/guardian. If a Reportable/Serious Reportable incident or Abuse/Neglect is found, the system provides the option to filter out staff names, as required by Jonathan's Law, when sending the OPWDD 147/148 state forms to the family/guardian.

Report on Actions Taken
to address an incident or allegation of abuse

NYS Office For People With Developmental Disabilities

This report includes any immediate corrective/protective actions taken in response to an incident or allegation of abuse to safeguard the health or safety of the person receiving services. This should include, but is not limited to, a general description of any initial first aid, medical/dental treatment, or counseling provided. Further actions may be taken by agency administration. For ongoing and additional actions may be taken pending the results of the investigation, please contact _____ Admin, Justin _____ by _____

Active, Mary

When was discovered _____ Prelim. Class. of incident/alleged abuse _____ Injury

GER Preference

Create Behavior Event Record from Restraint Related to Behavior Event ☐ Always ☒ Optional ☐ Never

Note: If events defined as Reportable, Serious Reportable or Abuse/Neglect are specified in GERs, information on notifications to the corresponding selected entities (below) must be added before approving the GERs.

Notify in case of

High (Notification level) GER

The following events are considered as Serious Reportable and thus the notification level for GERs including these events must be High:

- Injury with Severe Severity (Hospital, ER/admission)
- AWOL/Missing Person
- Possible Criminal Act
- Sudden/Unexpected Death
- Suicide
- Homicide/Violence Death
- Accidental Death
- Unknown Death
- Mechanical or Physical or Chemical Restraint
- Medication Error that requires immediate medical attention (Physician's visit or Emergency Room visit)

Medium (Notification level) GER

The following events are considered Reportable and thus the notification level for GERs including these events must be at least Medium:

- Injury with Moderate Severity (Nurse/Physician treatment)
- Natural/Expected Death
- Medication Error that requires consultation with Nurse or Physician or ER/Poison Control Center
- Sensitive Situation

Abuse/Neglect GER

The definitions of Reportable and Serious Reportable are taken from the definition provided in OPWDD emergency regulation to implement Jonathan's Law.

Incident Reporting

► Management Summaries & IRMA

Therap's Management Summaries gives a simple and effective way to keep track of all the events occurring in an agency while using one or more modules. Different incidents reported and behavior events that have occurred across multiple agencies can be reviewed using this module. Information can also be viewed on staff members who are using the Therap system. Users can create these reports by specifying a date range and time period such as Annually, Quarterly, Monthly, Weekly, and Daily. Clicking on the entries in those reports will show detailed information. The reports can also be sorted and filtered by choice. It also gives the option to export to an Excel file that can be used to create graphs, use advanced filters like auto-filter or merge with other data. Users will find a comprehensive list of GER and BER fields as output columns on the Event Summaries Search page.

Users (such as state personnel) can use the administrative GER Interval Reports. This can summarize information on the time taken to review a submitted incident report, to approve a reviewed report, and follow-up on an approved report for all agencies at once. Additional details like average and maximum/minimum time taken for review and follow-up, as well as detailed statistics on login, Programs, Sites, and CaseLoads can also be generated.

As with other modules in Therap, Incident Reports are initially entered into the system by the person witnessing the event. The report is then shared with all the team members who need to see and review it (staff can be notified via email, pager, text message, or Secure Communication). This means that a more timely and efficient response can be made to the incident (and documented appropriately).

Figure: Multi-Provider Intervals Report for GER

Therap has agreement from OPWDD to build an interface to IRMA, the state Incident Management system that will allow incident reports entered in Therap to be submitted directly to OPWDD.
