Therap®

Person-Centered. Data-Driven.
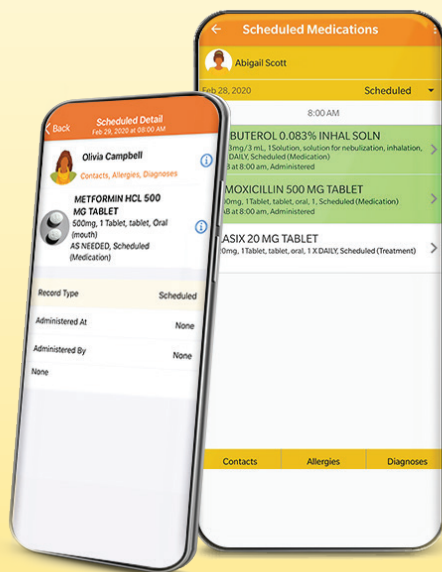

Comprehensive Medication Administration Solutions

Medication Administration Record (MAR)

Therap's Medication Administration Record (MAR) module is a versatile tool for tracking medication administrations. By using this feature agencies can reduce the likelihood of serious medication errors while increasing compliance.

- Manage Medications & Treatments
- Easy-to-Read Color Coding
- Drug Data Bank Interface

- Check Due/Overdue Report
- Search and Report Tools

Mobile (MAR)

Therap's Mobile MAR provides users an on-the-go solution to document medication administrations from mobile phones and tablets.

- Document Scheduled and PRN Medications and Treatments
- Featured Medication Images from Drug Data Bank
- View Allergies, Diagnoses, and Medical Contacts

Our Pharmacy Offers the Therap Pharmacy Interface.

We can Push Medication Data to Your Therap System.

*Pharmacy Interface

- Reduce transcription errors with direct Pharmacy Messaging

- Create medications from Pharmacy Messages

- Save time between medication delivery and input to Medication Administration Record (MAR)

- Track RX numbers and prescriber information

Pharmacy Messages

- Used to update an individual's medication schedule and translated onto Medication Administration Records (MAR)

- Contains various medical information such as medication name, administration details, drug codes, prescription number, and refill information

*Pharmacy Interface is subject to pharmacies using compatible software packages, and to have an active Therap Pharmacy Interface Agreement in place.
