# DIVISION OF DEVELOPMENTAL DISABILITIES SERVICES COMMUNITY SERVICES/ ADULT SPECIAL POPULATIONS

### **Aspiration/Choking Protocol #6**

Prepared by: Lisa Graves,	, RN BSN, Teresa Mun	nford, & Susan Poore,	RN Date: May, 2010
Approved by: Marre	-12 Gla	Date: 5/	17/10

#### I. Objective

To effectively identify individuals who are at risk for choking/aspiration; and to provide staff with appropriate interventions to manage safe eating practices.

#### II. Standards

- A. An Annual Aspiration/Choking Risk Assessment shall be completed by the assigned nurse to coincide with the individual's yearly ELP. (Exhibit A)
- B. Individuals coming into residential services will be assessed at the time of the admission.
- C. Re-assessment shall be completed if there is a change in health status or any risk factor is identified.
- D. Individuals identified at high risk, who do not have existing interventions established, immediate action must be taken to ensure their safety is maintained.
- E. The regional nursing supervisor or agency nursing director must be immediately notified for individuals newly assessed at moderate or high risk. The regional nurse supervisor or agency nursing director must also notify DDDS nurse administrator of these assessment findings.
- F. The outcome of the assessment shall be discussed with appropriate team members and an appropriate plan developed during the annual ELP meeting.
- G. An Individual assessed at moderate to high risk must have the risk addressed under the "Significant Medical Condition" section of the ELP Nursing Assessment, the needed Safety Supports, interventions and education outlined for staff to follow. The outcome of the Aspiration/ Choking Assessment shall also be documented.
- H. Modified diet and or liquid consistency must also be provided for the individual when outside their normal residential or day program setting.

## III. Recommended Assessments and Follow-up Based on Results of the Assessment

- A. Minimal Risk (Score 1-3)
  - No action warranted
- B. Moderate Risk (Score 4-6)
  - Referral to health care practitioner for evaluation with request for swallow study.
  - Request for speech therapy consultation to determine if dietary modification and/or the use of adaptive feeding equipment is required.
  - Team assessment of environmental or behavioral issues related to eating and aspiration/ choking risk.
  - During evaluation period, request for additional staff observation during mealtimes.
  - The above are to be completed if interventions are not already in place or are not sufficiently addressing support needs.

#### C. Severe Risk (Score 7 & Above)

- All of the above plus.
- Immediately stop all oral intake until swallowing can be evaluated.

### IV. Staff Education and Training

- A Aspiration/Choking risk training will be offered by DDDS Training and Professional Development to all newly hired staff.
- B. If an individual, following the completion of the Aspiration/Choking Risk Assessment, is identified as a moderate or severe, the nurse must provide education and training to the Residential, Shared Living and Day Program staff.
- C. Attached five exhibits
  - (B) For additional education purposes.

#### V. Individuals Requiring Conscious Sedation

- A. Individual must have appropriate preparation prior to procedure (i.e. nothing by mouth at least 8 hours before; medications dependant on instructions from practitioner).
- B. Following the procedure monitor the individual in the practitioner's office until alert and responsive to voice and touch. Individual should be able to remain in an upright position without assistance before transporting home.
- C. Two staff must be available to transport the individual home from procedure when conscious sedation is used, one staff to drive and one staff to monitor the individual for potential changes in consciousness or ability to breathe.
- D. At home following the procedure individual should be allowed to rest, but monitored one on one (in eyesight) at all times until individual is alert, responsive and back to baseline. Once the individual is back to baseline they should be monitored for changes every 15 minutes for the next eight hours.
- E. Ensure the individual can remain upright and back to baseline before offering medications, fluids, or food.
- F. Slowly introduce food and drinks, starting with sips of clear liquids (i.e. water)
- G. Should the individual vomit; hold food and drinks for 2 hours then slowly introduce liquids (i.e. sips of water).
- H. If no further vomiting, progress to ordered diet.
- I. If individual's condition declines (i.e. becomes lethargic, difficult to arouse or demonstrates symptoms of respiratory distress; 911 should be initiated).

#### **DIVISION OF DEVELOPMENTAL DISABILITIES SERVICES**

Exhibit B

# **Medications That Increase Aspiration Risk**

Benzodiazepines	Neuroleptics	Anticonvulsants	Corticosteriods	Lipid-lowering drugs	Anticholingergics	Potassium
Antineoplastics	Antidepressants	Anxiolytics	Calcium channel blockers	Antiparkinson agents	Antihistamines	Anticonvulsants
Antibiotics	Iron preparation	Quinidine	Nonsteroidal Anti-inflammatory drugs	Diuretics	Narcotics	Muscle relaxants

# **Common Choking Hazards**

Popcorn	Potato Chips	Fruit seeds	Hotdogs & Sausages	Hard Candies	Raw Carrots
Potato Salad	Grapes	Raisins	Peanuts & nuts	Chunks of meat	Apple chunks
Coins	Balloons	Jewelry	Toys with small parts	Small balls & marbles	Arts & Crafts

### **Aspiration/ Choking Prevention**

Feed small amounts w/ recommended consistency & 7	Texture (no more then 1/2 Teaspoon)	Remain upright for 30 minutes
Avoid excessive sedation	the second secon	Take at least 20 minutes for meal time
Provide oral care		Proper positioning

Make sure they have swallowed the first bite before presenting another

Maintain a pleasant eating atmosphere

#### Risk Factors for Aspiration/ Choking

11011 401010 101 710	pridate in Checking
Food remaining on the tongue after swallowing	Poorly fitted, damaged denture or edentulous
Pocket of food on side of mouth	Neglected oral care
Excessive drooling	Use of medications that may affect swallowing- See Exhibit B
Coughing or chocking while eating or drinking	Onset of illness which may affect physical ability
Gargling- sounding voice after eating or drinking, throat clearing  Unplanned weight loss	
Rumination	PICA Behavior
Inability to maintain posture	Changes in voice

Past and present eating habits (shoveling/ Rapid Ingestion, Food Stealing)

Any history of aspiration pneumonia

Poor appetite which may stem from fear of choking

Nasal regurgitation

Nasal discharge during meals

Frequent urinary tract infections

# MECHANICAL SOFT DIET

Food Group	Foods Allowed 🙂 🙂 😊	Foods To Avoid 😂 😊
Meat, Fish, Poultry, Eggs, Cheese and Meat Alternates	Mechanically ground meat, fish and poultry; soft casseroles containing mechanically ground meats (such as: beef stroganoff, beef and macaroni casserole, lasagna, spaghetti with meat sauce); macaroni and cheese; sloppy joes; soft tacos with	Peanut butter; meats unless they are mechanically ground and moist; chili; chunky tuna or egg salad containing raw vegetables
CC:	ground meat; burritos with ground meat; soft tuna or egg salad; chicken, turkey or ham salad made with mechanically ground meats; mechanically ground luncheon meats mixed with mayonnaise; scrambled eggs; sliced or chopped hard cooked egg; most cheeses including American and cheddar; grilled cheese sandwiches cut into ½ inch size pieces	
Breads, Cereal and Starches	Breads and soft rolls including muffins and croissants cut into ½ inch size pieces; dry cereals that soften in milk (such as: flake cereals); cooked cereal; whipped potatoes; scalloped potatoes and other soft potatoes; sweet potatoes; stuffing; noodles; rice; pancakes, waffles, and French toast softened with margarine and syrup; baked beans; French fries & hush puppies (cut into ½ inch size pieces)	Dry cereals (such as: granola) that do not soften in milk; bagels or hard crust breads (such as: Kaiser rolls); breads and cereals with nuts; soft pretzels
Fruits and Juices	Canned and soft fruit (such as: plums) hand cut into ½ inch size pieces; diced canned fruit (such as: peaches and pears) mechanically chopped into ¼ inch size pieces; orange or grapefruit sections without membrane; crushed pineapple; banana; watermelon; jellied cranberry sauce	Hard raw fruits unless mechanically chopped into ¼ inch size pieces; grapes; cherries

# MECHANICAL SOFT DIET

Food Group	Foods Allowed 😊 😊 😊	Foods To Avoid 🙁 🙁
Vegetables	Well-cooked vegetables hand-cut into ½ inch size pieces; raw salads and raw vegetables mechanically chopped into ¼ inch size pieces	Whole kidney beans; brussel sprouts; raw vegetables and raw salads (unless mechanically chopped)
Soups	All soups except soups with large chunks of meat.	
Desserts	Ice cream (with toppings smaller than ½ inch in size); fruit ice; sherbet; Oreo cookie shakes and ice creams; pudding; custard; custard-type or cream pie filling (no crust except graham cracker crust); Jell-O; yogurt; moist cakes with icings (no candy decorations); cupcakes and snack cakes; soft fruit or fig bars; soft doughnuts; soft marshmallow cream cookies or cakes; chocolate candy bars; peppermint patties; chocolates with cream filling; soft fudge	Those with nuts or candy bar pieces (such as: candy bar blizzards); chewy candy (such as: caramels, taffy, toffee, licorice); granola bars; hard candies; chewing gum; chewy marshmallow candy; jelly beans; gummy bears; gumdrops
Miscellaneous	Margarine; plain gravies; cream cheese; cheese spreads; mayonnaise; sugar; salt; herbs; spices; jelly; preserves; condiments; relish; puffed cheese curls; cheese balls; potato chips; dips for chips and vegetables	Fried snacks (such as: com and nacho chips); popcom; marshmallow fluff; marshmallows

# TOTAL GROUND DIET

Foods Allowed © © ©	Foods To Avoid 😂 😂
Moist mechanically ground meat, fish, or poultry; mechanically chopped casseroles (such as: macaroni and cheese, lasagna, spaghetti with meat sauce, ravioli, manicotti); soft tuna salad without celery pieces; egg salad; regular scrambled eggs; cottage cheese; cheese sauce; shredded cheese	Meats unless they are ground and moist; hard-cooked egg unless combined in other dishes; peanut butter; all others.
Cooked cereal; whipped potatoes; sweet potato fluff; mechanically chopped stuffing; soft noodles mechanically chopped into small pieces; pancakes, waffles, French toast or plain muffins softened in thickened milk. Muffins with lumpy ingredients should be pureed. Flake cereal (without raisins or nuts) or krispies must be prepared as follow:  Add 1 & ½ juice glasses (6 oz) of milk to ¾ cup cereal; stir the cereal and let stand for 15	Dry breadcrumbs or any other dry cereal except flakes or krispies; whole breads including rolls, bagels, biscuits and croissants; crackers unless softened in thickened liquids.
minutes until milk is completely absorbed.  Hand-mashed banana; mechanically chopped canned peaches, pears, apricots and fruit cocktail; crushed pineapple; applesauce; jellied cranberry sauce. Dried fruit must be cooked and then pureed.	Canned, fresh or frozen fruit unless mechanically chopped; dry fruit unless cooked and then pureed.
	Moist mechanically ground meat, fish, or poultry; mechanically chopped casseroles (such as: macaroni and cheese, lasagna, spaghetti with meat sauce, ravioli, manicotti); soft tuna salad without celery pieces; egg salad; regular scrambled eggs; cottage cheese; cheese sauce; shredded cheese  Cooked cereal; whipped potatoes; sweet potato fluff; mechanically chopped stuffing; soft noodles mechanically chopped into small pieces; pancakes, waffles, French toast or plain muffins softened in thickened milk. Muffins with lumpy ingredients should be pureed. Flake cereal (without raisins or nuts) or krispies must be prepared as follow:  Add 1 & ½ juice glasses (6 oz) of milk to ¾ cup cereal; stir the cereal and let stand for 15 minutes until milk is completely absorbed.  Hand-mashed banana; mechanically chopped canned peaches, pears, apricots and fruit cocktail; crushed pineapple; applesauce; jellied cranberry

# TOTAL GROUND DIET

Food Group	Foods Allowed 🙂 🙂 😊	Foods To Avoid 🙁 🙁
Vegetables	Mechanically chopped canned and cooked vegetables (except corn, which must be pureed). Pureed raw vegetables and salads.	Whole corn unless pureed; raw vegetables and salads unless pureed; all cooked vegetables unless mechanically chopped.
Soups	Tomato soup; broth or bouillon	All soups unless mechanically chopped.
Desserts	Pureed Jell-O; soft-serve ice cream; fruit ice; sherbet; frozen yogurt; milkshakes; puddings except rice pudding which must be pureed; custard; custard pie filling; cheesecake filling; mousse; plain and fruit flavored yogurt; cakes or cookies softened with thickened milk. Cakes, cookies or muffins containing textured ingredients must be pureed. Whipped toppings; chocolate syrup; caramel syrup; *popsicle; *fudgesicle	All desserts or toppings with nuts, seeds, raisins, coconut, candy bar pieces or any chunks. Regular cake and cupcakes unless softened with thickened milk. Cookies and crackers unless softened with thickened liquids; no candies or pie crusts. Cakes, cookies, pies, brownies and cupcakes with lumpy ingredients must be pureed.
Miscellaneous	Butter; margarine; plain gravy (no chunks); mayonnaise; sugar; salt; herbs; spices; jelly; syrup; condiments; grated cheese; pickle relish; cheese sauce	All others including bacon bits, pickles, preserves, salsa.
	*Use appropriate caution and supervision when food items contain a stick.	
	*Individuals on thickened liquid diets may not have popsicles and fudgesicles.	

# PUREED DIET

Food Group	Foods Allowed © © ©	Foods To Avoid 😸 😸
Meat, Fish, Poultry, Cheese and Eggs	Pureed poultry; pureed meat; pureed fish; pureed cottage cheese; pureed eggs	All other meats and fried or hard cooked egg.
Breads, Cereals and Starches	Whipped or mashed potatoes; pureed sweet potatoes; pureed rice and pastas; cooked cereals (except oatmeal which needs to be pureed)	Breads and crackers; all dry cereals; oatmeal except if pureed; dry bread crumbs; all other potatoes, pastas and rice
Fruits and Juices	Pureed fruits; applesauce	All non-pureed fruits
Vegetables	Pureed vegetables; tomato juice (thickened if needed)	All others
Soups	Tomato soup; broth and all pureed soups (thickened if needed)	All non-pureed soups (except tomato soup and broth)
Desserts	Pureed Jell-O; plain pudding, custard or custard pie fillings; plain yogurt or yogurt with pureed fruits; pureed desserts; pureed cake and cookies; chocolate syrup; caramel syrup	All others; rice pudding and tapioca pudding must be pureed.
Miscellaneous	Butter; margarine; plain gravy (no lumps); sugar; mayonnaise; salt; herbs; spices (such as garlic or onion powder); jelly; mustard; ketchup	All others including grated cheese; tartar sauce; relish; jam; preserves; chunky salad dressings; chopped or minced garlic or onion

Mechanical Soft Diet – This diet consists of soft foods that are easy to chew. With the exception of meats which should be served mechanically ground and raw fruits and vegetables which should be served mechanically chopped, other foods should be hand chopped into ½ inch size (or smaller) to aid chewing.

#### Actual 1/2 Inch Size

Total Ground Diet – This diet consists of food for individuals who are unable to chew food. All foods will be mechanically chopped or mechanically ground into one-quarter inch size pieces; corn, raw vegetables, salads, rice and textured muffins will be served pureed as specified by menu). The menu modification sheets will list the appropriate substitute at each meal for bread and rolls (e.g. an extra 4 oz of the starch or an extra 2 oz of the casserole). Cakes, cookies, pancakes, French toast and waffles will be moistened in thickened milk (by the Dietary Department). Textured cakes and cookies will be pureed.

## Actual 1/4 Inch Size

**Pureed Diet** – This diet consists of food for individuals who are unable to chew food. All foods are blenderized to a smooth, moist consistency. The menu modification sheets will list the appropriate substitute at each meal for bread and rolls (e.g. an extra 4 oz of the starch or an extra 2 oz of the casserole).

The following list of foods contains acceptable choices for individuals on Mechanical Soft, Total Ground and Pureed Diets. Exceptions can be made on an individual basis with the approval of the Speech Language Pathologist. A speech referral needs to be sent to Therapy Services and an evaluation by the Speech Language Pathologist needs to be done. If she finds that an individual may have snacks outside his/her diet consistency, then the exceptions will be added to his/her Mealtime Guide sheet. Only the Speech Language Pathologist is allowed to make exceptions to an individual's diet consistency.

# **LIQUID CONSISTENCIES**

The texture of the liquid an individual receives is recommended by an Occupational Therapist or Speech Pathologist and is ordered by a Doctor.

The texture of food should not be thinner than the prescribed liquid consistency.

- ❖ Thin: Includes all liquids, Jell-O, sherbet, Italian ice, and ice cream. This consistency is considered non-restrictive. Nothing is added.
- ❖ Nectar: Apricot or tomato juice consistency; some liquids will require a thickening agent to reach this consistency.
- Honey: Liquids can still be poured, but are very slow. Liquids will require a thickening agent to be added to achieve this consistency.
- ❖ Pudding: Liquids are spoonable, but, when spoon is placed upright, it will not stay upright.

Remember that all thickening agents whether commercial (Thick-It, Thick and Easy) or non-commercial food items (instant potatoes, baby fruits, baby cereal etc.) add extra calories to the foods or liquids they are added to. If the individual is on a reducing diet, these calories must be considered. The dietitian must be advised if a thickening agent is to be used.
