

T-Speak Terms

Dashboard

Up-to-date list of forms and reports that you need to read or respond to in your home page. This page contains information from Therap modules that you have access privileges to including T-Log, GERs and ISPs. The Dashboard groups relevant modules in tabs making it easier for you to browse through them.

T-Log

Record program specific information and document various aspects of an individual's daily life including activities, injuries, behavioral patterns or concerns. Gather your shift notes, behavior notes and activity logs all in one place and automatically share them with other staff members.

SComm- Secure Communication

Share the equivalent of email messages with others in your agency in a secure, HIPAA compliant way. Include individual specific information, Therap forms and external documents in your messages.

ISP Program

Often referred to as teaching strategies, allowable services, activity of daily living or goal tracking, this module allows you to design teaching/training programs and document goals, objectives, and progress towards outcomes by using customizable scoring methods.

ISP Data

Collect data based on the type of service described in the ISP Program and record the service time. The data can be used to generate monthly reports that track an individual's progress and measure their outcomes.

ISP Plan

A person-centered planning process which allows easy workflow for documenting an individual's goals and objectives. The services and supports required to accomplish those objectives can also be included in this module.

Attendance

Record comprehensive attendance data for individuals receiving services with options to track time in/out and use flags to mark presence or absence for billing purposes. Reports can be generated to track attendance summary information for services provided.

Health Tracking

Document an individual's medical information such as intake and elimination, medication history, vital signs, height/weight and upcoming appointments.

GER- Incident Reporting

Record instances of reportable events such as injury, medication error, restraints, death and the other category. State specific information can be added to the form and printed for submission.

Training Management System

Track, manage, and schedule staff training courses and upcoming classes. Record and attach staff certification information when publishing results.

Time Tracking

Document and track individuals' data based on time. This may be used for bed checks, sleep, behavior, and much more. Administrators can create necessary Time Tracking templates.

Emergency Data Form

Produce a summary of emergency information for an individual that is pulled from the Individual Data Form. Includes health diagnoses, emergency contacts and insurance information.

Individual Data

Enter demographic data including address, contact numbers and known allergies for individuals. Other information can be added here including required level of supervision, dietary guidelines, and agency policies.

MAR

Record medications as administered to an individual based on treatment schedules. Different statuses of treatments allow to track medications being given.

Individual Home Page

Access a comprehensive view of individual focused information. Obtain summaries regarding an individual's health, medications, and services received using this module.

Issue Tracking- My Issues

Contact Therap Support for issues while using Therap Applications or send your feedback and suggestions. Track your Live Help chats on 'My Issues' for future reference.
